

## Luminex introduces BSI CTMS for clinical trials management

New Jersey, February 18th, 2020 – **Luminex Corp based out of Austin, Texas will be working with CTMS for clinical trials management. The project will involve setting up a standard interface to IBM® Clinical Development that Luminex is already using.**

Luminex is set to become the pilot customer for the standard interface between **IBM Clinical Development** and **BSI CTMS**. The go-live of BSI CTMS for Luminex is expected in June 2020. IBM Clinical Development is IBM's proprietary electronic data capture (EDC) solution designed to provide end-to-end visibility as well as contains patient, site, and clinical trial management capabilities.

"The BSI CTMS solution is impressive in its own right thanks to its intuitive usability, broad functionality and value. We expect to reap rewards in the areas of trial oversight, site monitoring, and document management with the integrated eTMF function. It was also the opportunity to map the CTMS with IBM Clinical Development – the existing EDC solution – that swung the decisions in favor of BSI CTMS," said Deena Eden, Senior Manager of Clinical Operations at Luminex.

"Luminex has used IBM Clinical Development to run several trials to date. Its ease of use and intuitive interface made the capture of clinical trial data seamless, which drastically improved data quality and reduced trial time." commented Bhavna Adhin, Manager of Statistics, Programming, and Data Management at Luminex.

The interface is expected to be a valuable option for future clients going forward.

"With this interface we are only adding to the attractiveness of BSI CTMS for prospective clients," commented Jan Nielsen, BSI's Community Manager for Life Sciences.

"The ability of the EDC - IBM Clinical Development - to exchange data with BSI CTMS, creates a solution that is far more than simply the sum of its parts, and is expected to help us drive our business goals," he continued.

"We look forward to collaborating with Luminex and BSI CTMS to help effectively plan and manage trials," said Sébastien Bohn, Offering Manager, Lead for IBM Clinical Development, IBM Watson Health.

IBM Clinical Development is designed to reduce the time and cost of clinical trials by: i) centralizing and organizing clinical trial details; ii) providing 24/7 access to clinical trial data via a single URL from any web-enabled device; and iii) providing a flexible and scalable data management platform to help design and manage clinical trials by incorporating optional clinical trial-specific features and services.

### About Luminex Corp

At Luminex, our mission is to empower labs to obtain reliable, timely, and actionable answers, ultimately advancing health. We offer a wide range of solutions applicable in diverse markets including clinical diagnostics, pharmaceutical drug discovery, biomedical research, genomic and proteomic research, biodefense research, and food safety. We accelerate reliable answers while simplifying complexity and deliver certainty with a seamless experience.

Everyone talks about digitization – BSI lets actions speak for themselves. Our software makes companies more successful and users happier. BSI CTMS is the comprehensive solution for clinical trials management. There are also innovative applications such as the BSI Studio automation and digitalization platform and BSI CRM, one of the leading omni-channel platforms on the market, with smart industry solutions for retail, banking, health and insurance. And always present: a 360 ° view of all data and authentic full service from A to Z. Robust technology that convinces today and is ready for tomorrow and beyond. More than 120,000 users profit from our software daily in companies such as Actelion, ALK Abello, Deutsche Bahn, Dokumeds, OCT, Lidl, Proinnovera and Roche. Behind it stands the work and dedication of 330 engineers and project managers in Baar, Baden, Berne, Darmstadt, Dusseldorf, Hamburg, Munich, New Jersey, Zurich, and anywhere you need us to be.
